

Map – Titan's Teeth

written by CresthavenRPG Guru | March 3, 2015

Titan's Teeth Tower Map

The wonderful Dyson Logos has released this amazing tower map!

There is a stout tower along the Akkedis Trail that is decorated with massive white chunks of stone along its battlements. To those who pass through its shadow on the trail it has become known as either the Crown of Teeth, or the Titan's Teeth.

It is said that the "teeth" were pulled from the ancient corpse of a primordial titan of wind and sight. The same tales would claim that the teeth confer some of the titan's powers to those who stand atop the tower, granting the ability to see incredible distances and to accurately shoot at twice or three times the normal range of a longbow.

The Titan's Teeth has four levels above ground (plus the battlements) one level half underground and a final "dungeon" level underground that contains a secret passage to the surface some distance away.

This is the first map released on the blog under a fully free commercial license. For more information on the license or to download the map with or without grid, head on over to the blog post at:
