Technology as Magic

written by CresthavenRPG Guru | September 30, 2019

I've been brainstorming some ideas for new magic items and I'm really loving the idea that tech is magic. Not today's technology, but maybe technology that is 10-50 years into the future. Obviously this brings the whole setting into question (what happened that everything is wilderness now? where did these's other species come from?)

Things like:

- Magic sphere – (force field emitter)
- Boots of speed (Healeys or roller skates)
- Flashlight
- Glow rod (stun / taiser)
- Folding tent (just a modern tent ultra compact)
- Knowledge box – (Alexa?)
- Backpack of many pockets (just a high tech backpack that makes finding items instant)
- Door scanner (glow rock hand print lock)
- Pocket fortress port o' fort (a more "military grade" tent)
- Mask of water breathing (scuba mask)
- Boots of swimming (fins)
- Box of magic detection (geiger counter)
- Staff of metal detection – metal detector
- Straw Of purification – think life straw
- Substance Box (for turning anything into a nourishing pill)
- Telescopic goggles
- Infravision goggles (nightvision)

What do you think? Ideas? Thoughts? Post a comment below!
